ActiveX Web Programming: ISAPI, Controls, And Scripting

Synopsis

Everything you need to know to develop the most dynamic, interactive Web applications ever, using all the new technologies introduced by ActiveX. Now Active X Web Programming shows Web developers how to use and take full advantage of the ActiveX suite of programming tools and technologies. Noted Internet developer Adam Blum tells you everything you need to know about ISAPI, ISAPI filters, ActiveX controls, VBScript, and server-side scripting. You get: Tons of useful sample code, reusable class libraries, and utility programs * C++ classes to assist in building your Web applications * In-depth coverage of ISAPI and ISAPI filters to extend the functionality of your Web server * Sample programs that illustrate how to use each ActiveX technology * Demonstrations of how to integrate Java with ActiveX/COM using the Visual J++ environment * VBScripts to create rich client-side functionality for your Web site * Denali tutorial and sample scripts for easy-to-build server-side functionality. Be sure to visit the companion site, where you will find: * Source code for all the programs described in the book * Working examples of applications built with ActiveX technologies.
