Customer Reviews

Definitely not for dummies. Hard program to master if you have no bookkeeping experience or education. Fortunately I own the business so I can practice at work. Don’t plan on this if you are an
employee expected to use this program daily. Steep learning curve.

I haven’t been able to solve my problems with the program. I started by reviewing the chapters, then reviewing the index, then going to pages that the index suggest. The book to me is not practical. The problems that I have using the program are not addressed in a way that I can go to the index, look up the question that I need to solve and find the answer of it. I have spent quite a few hours trying to decipher how to use it and reading it but up to now it has not worked for me. I will admit that I am not the most computer savvy but then that is why I purchased the book so that it could help me. I really wish it did. Maybe others will understand it better than I.

This book is not for dummies. I have used Timeslips for over 15 years and bought this book to help the person who will inherit the billing job. Ay yi yi! Just reading the first page made me want to give up. The terminology used is not for beginners. Luckily I have a few old manuals which will be more valuable than this book. The seller was just fine with quick delivery.

too much info to deal with, but little actual direct info to get to the meat of the essential steps. helped to recognize terms when actual training started but that’s about all. Thanks.

Book for users only not for install or customize operations, good for users, not to complicated.

No help at all
