Mad About Macarons!: Make Macarons Like The French

Synopsis

The best guide available for making Parisian macarons at home. Jill Colonna guides you simply yet precisely through each step in making perfect Parisian macarons every time. Stylish and fun, this colorful book contains 37 tried-and-tested macaron recipes plus well over a hundred mouth-watering photos. Classics contain rose or pistachio and also include a nut-free macaron. Be inspired with sticky toffee, chocolate-beetroot or pistachio-wasabi to giant coffee macarons with tiramisu cream. Stun your guests with mini Thai Green Curry Macarons, sensational either before or during dinner. Beverage pairings are suggested for each gluten-free macaron recipe, along with decorative ideas for weddings, children's parties, gifts plus many other tips. Note: Measurements are given in grams.

Customer Reviews

I've made at least 15 batches macarons from various recipes and none would turn out correctly. Once I tried Jill Colonna's method of just mix the hell out of the batter and then fold it towards the end to achieve the right consistency - my macarons came out perfect. I've made 8 batches of macarons using this method with great success each time. I won't be going back to the gently folding the batter until it looks like molten lava method. The flavor combinations are great. There's a section just for chocolate! What I liked best is that at the end of the book Jill gives you an egg equivalent chart for any amount of leftover egg whites you have. This is a great resource. Her macarons are not as sweet as the other recipes also. I highly recommend this book for anyone is starting to make macarons. It takes the frustration out of trying to make macarons. No more flubbed shells with this method!

I initially bought Macarons by Cecile Cannone. Please see my review for that book. Although the taste was wonderful, the presentation was off. My shells would never look perfect. The feet would never be perfect across all batches. They weren't round. The list goes on. So I moved to an intermediate learner book called Mad about Macarons! Here is what I have learned:

Additional things I had to buy:- medium sieve (Williams Sonoma does not sell one with large enough holes to work. I had to go to Sur La Table and get this strange looking thing. A big short cylindrical metal thing with a wire mesh attached to one side. It cost about \$40)- a hand spatula that is flat on one end and round on the other (again, only could find at Sur La Table. It cost \$4)- a digital scale (I got it at Williams Sonoma. I have a spring weighted scale but that is in ounces. This book is all in grams. The digital scale really helped on that end. Think I paid \$50)- bought a bigger Wilton frosting bag to put the shell batter in

Things I stopped doing (that I had to do with the other book)- stopped having to put egg white powder in to take care of humidity problems. yay!- stopped having to worry about how I mix the batter- stopped having to put salt in the egg mix- stopped having to refrigerate my leftover almond meal and then put it in the oven pre-mixing to get the humidity out. Thank God!

What is cool about this book:*

- it firmly recommends you sift your sugars, powdered sugar (which she calls icing sugar by the way), almond meal, cocoa powder if using, etc).

I like it! I throw out my big almond chunks and although I had some initial heart ache about wasting expensive stuff, it really makes the mix look so soft when you are dry mixing it with your whisk!

* in this book it states you can mix the liquid and dry mix together crazily and not worry about it. I was so scared of how to mix my batter before, I kind of like this method. Don't over mix though...I saw oil stains in my shells last time I did that.*

tells you how to get perfect round macarons. Follow what it says. Let your tip rest on the cookie sheet and then put pressure on to build a circle. It really works! Do this at a 45 degree angle. Previously, I was doing a 90 degree angle and my shells were uncontrollable and not perfectly circle. Totally bugged me!

* I like my new tools. They make everything easier. Love the hand spatula. Love the strange looking strainer. Love Love Love!

* No need to open the oven sporadically to let the humidity out.*

The recipe is better for the shell. I no longer have oil stains or cracked shells. My feet are perfect. I do not have to use two cookie sheets at once either (one to insulate the other). How do I do this?

1. my oven temp has to be at 300 degrees NO convection. The fan burns my shells on the side the airflow is going.
2. Cook for 10 minutes. Perfect.

What I kind of don't like about this book:-

- where the heck do I get things like custard powder? It's in one of the recipes...still no clue how to find that easily. I think some other ingredients might be like this as well.- it doesn't have a troubleshooting section like the Macarons book has. Hence, I'm glad I bought both.- I would say that

these recipes seem more like european desired flavors and the Macarons book is more the american flavor style. What I mean by that is the Macarons book has more things like chocolate coffee flavor, salty caramel on chocolate, etc. the flavors in this book seem more "exotic" but I haven't tried anything crazy yet because I needed to perfect my shells first. It took me about five batches to get the shell perfect with this book, but I never could do that with the other. I got frustrated. So now I use this one for shells but I mix recipes with the other. I'm glad I bought both. I would say this one is an absolute must if you want your shells to not only taste perfect, but look perfect for giving. Hope this helps!

When I went to Paris in 2009 I fell in love with macarons. Unfortunately finding them in the States is not that easy. When I found out that you could make them at home I tried, and trust me it was a mess. Some of the other books out there are not as exact!! Jill goes into just the right amount of detail. Just finished my first batch from the book, they turned out perfect!! If you are looking to try making macarons at home Mad about Macarons is the way to go!!

I bought this because my wife challenged me to make her Macarons. I have almost no baking experience (other than the pilsbury cake mixes) and I kept hearing from everyone how Macarons are impossible and that it takes 10 or more tries until something decent comes out. So I did the sensible thing and cruised for the right instructions. Based on the reviews, this book seemed to be it. Well, it is! My first batch produced nice macarons. Nothing you could sell at a shop, but true macarons. My second batch was better. My third made me think I'm the world's expert macaron expert. Well, I'm probably not, but it's a nice thought. Key points:- The recipe is foolproof. If I can do it, everybody can. Seriously.- Measurements have to be exact. This is not a feature of this book, it's true for Macarons in general (google it)- The most difficult part was finding the American equivalent of the British ingredients. I now know where to find it (on their facebook page and here on the reviews). Don't try to substitute unless you know what you're doing; almost all of the ingredients can be found in your local safeway or ordered on .

This is a beautiful book that has super easy instructions for the first time Macaron maker. It give great details, a product information list in the back and delicious recipes from the sweet to the savory! Perfect for making this delightful treat.
