I got this hoping to find some good from scratch recipes to use but most of them seem to have a cake batter base to them and just ok, I have a from scratch chocolate cake-pop recipe that is great but it didn't come from this book and was hoping to find more good ones. The glazes however are wonderful.

This book has a wide variety of recipes including appetizers. I like the fact that all of the recipes are for actual cake pops made in the cake pop baker, not where you mix up a cake mix and add icing to it to make the balls. I have so many recipes marked to bake it will keep me baking something new for a long time. I also like the added notes, to either slightly change the recipe or suggestions on how to use the cake pops. Even has a section on cake pops for special occasions. I'd seen all the cake balls cook books but wanted something beyond that and not just with sweets.

I guess I should have done a little research on "pops" because they're awfully sweet--- the ideas are cute, and will occasionally be sharing with grandkids but they're basically more trouble than they're worth although if you're "idea challenged" then the book will be a good source for you to peruse..

This is indeed a better book than the first edition, that I purchase two years ago. It has more recipes, tips, and suggestions and more color pictures. So yes I would recommend this for any serious cake Pop Maker.

I would love to see a few more photos in this particular book. well done, easy to read and full of great hints and things I would have not thought about since I m far from being a baker. Give me a Kamado grill or BBQ and I win hands down, no so baking.

I love these books and this is my second one. I have only tried a few recipes and I prefer the ones that don't use cake mixes, but there are still a lot of great recipes. So far, we've liked everything I've tried. There are lots of recipes for cakes, muffins, frostings, dips and ideas for decorating. The recipes are great but are really designed for the Babycakes cake pop maker.

This book has quite a few recipes for the "baby cakes" cake pop maker. It has an excellent tutorial with lots of tips and suggestions to making cake pops easier. Just wish there were more pictures. It is always nice to see what the recipe is supposed to look like.

The recipes work and taste good too. The tips are helpful. Can't make enough for my four hungry kids. They don't wait for me to put sticks on them. They just grab a fork and start eating.
