There are lots of great things about *PILLOW TALK*. It is spiral bound so the pages lay open without having to weight them down or break the binding by pushing too far. It comes with a CD that is full of embroidery designs such as flowers leaves, snowflakes and a complete alphabet. And, of course, there are the projects, sixteen in all. Don't forget - there are also recipes too. I mean who can quilt and embroidery without food? Yes, one of them is about chocolate. The Basic Techniques section talks about continuous bias, making welting and how to put in a zipper. The method shown is so easy I can't wait to try it. The pillow patterns come in all shapes - rectangular, square, a flower with petals, hearts, neck rolls and even a poinsettia. The embroidery designs used to accent the pillows

are ones that you will be able to use over and over again. Instructions are easy to read and follow with a materials list, how to cut the material and lots of large, clear graphics showing you the steps. If you want to give pillows as Christmas gifts or if your bedroom or living rooms needs a few new accents, PILLOW TALK will walk you right through the process.

I was actually surprised about this book. It is much better than expected. It has a lot of excellent information on making all sorts of pillows - lots of kids, but then a lot of very tailored ones you might put on a very expensive sofa... Very well written and explains why they do what they do... which was very interesting to read. I wouldn't call it a generic pillow book - it is a step or 2 above that. It also has some beautiful embroidery designs too on a CD.

Was not what I was expecting. I thought there would be more examples and not so many instructions. I do however love the ottoman. It is now on my list of projects.

I was so pleased I was able to find the book I was looking for and at a great price.

Many great examples with complete directions for completing items shown.
